

CLAIMS

1. A tent eve, comprising:
a frame configured to extend over a tent and beyond tent side walls; and
a cover coupled to the frame configured to cover area spanned by the frame.
2. The tent eve of claim 1, wherein frame ends extending beyond the tent side walls are straight.
3. The tent eve of claim 1, wherein frame ends extending beyond the tent side walls are curved.
4. The tent eve of claim 1, wherein the tent eve is configured to reduce rainfall contact with the tent side walls.
5. The tent eve of claim 1, wherein the tent eve is configured to provide additional shading to the tent from sun.
6. The tent eve of claim 5, wherein the additional shading prevents ultra-violet (UV) degradation of the tent side walls.
